Employment Data for 2021 EPP Graduates in the level, specialty they were prepared

The FC EPP conducted an employability search to private and public schools during September to October 2021. The search came from two sources: ET-14 Survey done in Sept 2021 and search done in the Human resources office from the DEPR.

The result of the search is as follows:

A: In the private sector, five (4) EPP graduates are working in private schools in Fajardo, Luquillo, Rio Grande and Canóvanas.

B: IN the public system, there is only one (1) EPP graduate working in a public school in Fajardo.

Conclusion:

Out of ten (10) EPP UG 2021 graduates, only six (6) are working (60 %). However, only 4 of the six working, the employer filled the two instruments (40 %). EPP understands that it is much easier to first be employed in a private school as a first job. Once they obtain more experience, they tend to move to the public schools. The EPP will proceed to visit those schools where our graduates are employed to ensure that the employers fill two instruments to obtain data of teaching effectiveness and employer satisfaction. (IP-12 and ISP 16)

At the advance level, in June 2021 the EPP graduated three candidates. Of the three, the EPP found that there are no MA graduates employed at the DEPR. At the private sector two (2) out of three MA Leadership graduates (67%) are employed in the private sector, but they are working as teachers, not as directors. In relation to answering the instruments, only 2 out of three employers filled the instruments. (66 %)
