Employment Data from DEPR and Private Schools in positions where they were prepared for 2021 EPP Graduates

The FC EPP conducted an employability search to private and public schools during September to October 2021. The result of the search is as follows:

A: In the private sector, five (5) EPP graduates are working in private schools in Fajardo, Luquillo, Rio Grande and Canóvanas.
B: IN the public system, there is only one (1) EPP graduate working in a public school in Fajardo.

Conclusion:

Out of ten 910) EPP 2021 graduates, only six (6) are working (60 %) . EPP understands that is much easier to first start in a private school as a first job. Once they obtain more experience, they tend to move to the public schools. The EPP will proceed to visit those schools to ensure that the employers fill two instruments to obtain data of teaching effectiveness and employer satisfaction. (IP-12 and ISP 16)

At the advance level, in June 2021 the EPP graduated three graduates. Of the three, the EPP found that there are no MA graduates employed at the DEPR. At the private sector two (2) out of three MA Leadership graduates (67 %) are employed in the private sector .

Analysis:

The DEPR identified only 1 out of 10 2021 UG Graduates in the Public School system. Also 5 graduates are currently working in private school for the year 2021 to 2022 contract. This totals 6 out of 10 graduates = 60 %) graduates from June 2021 at the UG Level are employed

Once the TEP has identified the employment, we will proceed to visit the school director to ask to evaluate our graduate and evaluate his /her satisfaction of the effectiveness of the graduate by administrating the: ISP 16 and IP-12 Instrument
